

CAMPUS JOB REVIEW SYSTEM

Group 14: Neel Ghoshal, Mano Prakash Parthasarathi, Shivang Patel

DESCRIPTION

This project aims at providing recruiters and job seekers with a platform to track applications in real-time. Job seekers can store all their current applications and filter these based on their experience and interest. In addition, they can get feedback on their resume to better stand out in interviews. Recruiters, on the other hand, can post applications and have a descriptive dashboard to track all applicants and shortlist them based on the required qualifications and relevant skill set. Overall, it is an excellent portal for a smooth job-search and recruit experience.

TECH STACK
